

MSP ENGINEERING
APPOINTMENT OF MARC WELLSTED AS GENERAL MANAGER – MSP
PROCESS SOLUTIONS

Monday 14th December 2009

Long established Western Australian resource development consultants MSP Engineering recently announced the appointment of Marc Wellsted as General Manager of their wholly owned subsidiary company MSP Process Solutions Pty Ltd.

MSP Process Solutions Pty Ltd manages the distribution of specialised mineral processing equipment which includes the exclusive agency agreement with Allmineral GMBH & Co for the supply of jigging, classification and magnetic separation technologies within Australia and New Zealand.

Marc brings to MSP Process Solutions the knowledge of the current business capabilities in gravity separation, including 17 years experience in mineral processing, covering gravity and liquid/solid separation. He has been involved in business development and the marketing of mineral process equipment for most of his career and has international experience in base metal and coal beneficiation. Marc worked previously as an Area Manager for Mineral Technologies, Downer EDI Mining where he managed the Western Australian business. Marc holds a formal qualification in process engineering and business management.

“MSP Process Solutions is well positioned to support the current activity in demand for low grade gravity beneficiation plants especially in the iron ore sector of Western Australia”, said Marc, “and it is a great time to be involved in such a prominent and dynamic organisation. There are clear signs of increased activity and confidence in the minerals sector and we can add significant value to prospective projects by utilising world leading technologies.”
