

## MEDIA RELEASE

### TALISON LITHIUM AUSTRALIA PTY LTD CHEMICAL GRADE PLANT EXPANSION PROJECT UPDATE

Friday, 6<sup>th</sup> January 2012

In March 2011, MSP was awarded the full EPC for the Talison Lithium Chemical Grade Plant Expansion Project at Talison's operation in Greenbushes, Western Australia.

The project includes more than doubling the current facility's capacity to approximately 640,000 tpa of Lithium oxide concentrate.

The project is currently in construction phase with the bulk of engineering and procurement complete, along with earthworks, civil works and the majority of offsite fabrication complete.

The project has been delivered utilizing, as far as possible, local contractors in the Southwest region of Western Australia and provides them with an opportunity to showcase their delivery capabilities.
