

MEDIA RELEASE

ROCLA - GOLDEN GROVE EXPANSION PROJECT

Friday, 6th January 2012

MSP is pleased to announce the successful commissioning of the Rocla Golden Grove trommel expansion project.

MSP was responsible for the full EPC of the project, which included specialised design of a 200tph trommel / scrubber unit which was supplied via MSP's sister company FeCon Solutions.

This project was delivered on budget within a tight timeframe and was commissioned in accordance with the client's design criteria.

Once again the project represents MSP's long term continued association with the Rocla group spanning fifteen years and involving numerous capital works projects.
